

## Conclusion

In this case study, the Bhoomi project has been surveyed in detail with all aspects of introduction, objective, design and implementation of the software. . BHOOMI is a great success. On the lines similar to Bhoomi, many other States such as Tamil Nadu, Andhra Pradesh, Haryana, Gujarat, and Madhya Pradesh have also successfully implemented Land Records MIS.

## IT in Judiciary

The judiciary is a system of courts which interpret and apply the law. The role of the courts is to decide cases by determining the relevant facts and the relevant law, and applying the relevant facts to the relevant law. The **Indian Judiciary** administers a *common law system* in which customs, securities and legislation, all codify the law of the land.

Technology has proven its role in enhancing efficiency, improving access, as well as encouraging transparency, accountability, and adherence to timelines in dealing with legal matters.

India has taken a variety of measures to automate processes within the judiciary with an aim to improve efficiency and eliminate the time lost in unproductive work. Some of the initiatives are: easy accessibility to online case records and previous judicial pronouncements, reducing dependency on stenographers by utilising voice recognition software, usage of video conferencing facilities to increase the reach of courts, case management systems, e-registry of court, automated preparation of cause-lists, phasing out physical records though e-filing and e-submission of documents, etc.

### Judicial applications of IT

In 1990 a project named COURTS (Court Information System) was launched for the benefit of the entire legal community. This project was commissioned for streamlining registries of community. This project was commissioned for streamline registries of various courts, Subsequently, all High Courts have been computerized and Web enabled both locally and nationally through NICNET.

The following applications have been successfully implemented at the Supreme Court and also 18 High Courts in the country. The end result of these applications has been a lot of convenience, improvement and speed of legal service for the litigants who are common people of India.
